

Ayaan Rahman

Junior Software Engineer | Backend & Full-Stack Developer

Dhaka, Bangladesh | ayaan.rahman@example.com | +880 17XX-XXXXXXX | github.com/ayaan-dev | linkedin.com/in/ayaanrahman

PROFESSIONAL SUMMARY

Computer Science student and junior full-stack developer with hands-on experience building FastAPI backends, Next.js dashboards, database-backed applications, and data-driven tools. Strong skills in Python, JavaScript, TypeScript, SQL, REST APIs, Git, and problem solving. Interested in backend engineering, AI-powered applications, and scalable web systems.

TECHNICAL SKILLS

Languages	Python, JavaScript, TypeScript, C, SQL
Backend	FastAPI, REST APIs, SQLAlchemy, Pydantic, authentication basics
Frontend	React, Next.js, Tailwind CSS, component-based UI development
Data & Tools	PostgreSQL, SQLite, Pandas, NumPy, Git, GitHub, Docker basics, Linux/WSL

PROFESSIONAL EXPERIENCE

Backend Developer Intern | *TechBridge Labs* **Jan 2026 - Present**
Dhaka, Bangladesh

- Built REST API endpoints using Python, FastAPI, Pydantic, and SQLAlchemy for user profiles, application tracking, and dashboard metrics.
- Designed SQLite/PostgreSQL database models and implemented CRUD workflows for applications, todos, calendar events, and assistant sessions.
- Improved API reliability by adding request validation, clean error responses, unit tests with pytest, and structured service-layer logic.

Frontend Developer | *Campus Career Portal Project* **Sep 2025 - Dec 2025**
Remote

- Developed responsive Next.js and React pages for job search, CV upload, dashboard analytics, and application tracker features.
- Integrated frontend components with backend APIs, managed loading/error states, and used Tailwind CSS for reusable interface design.
- Implemented localStorage-based state persistence for uploaded CV metadata and user preferences to improve the user experience.

Data Analyst Trainee | *DataSpark Academy* **May 2025 - Aug 2025**
Dhaka, Bangladesh

- Cleaned and analyzed student performance datasets using Python, Pandas, NumPy, and SQL to generate weekly reporting summaries.
- Created small automation scripts for CSV processing, skill extraction, and keyword matching to support data-driven recommendations.
- Presented insights with clear charts, written reports, and actionable recommendations for improving learning outcomes.

PROJECTS

CareerPilot - AI Career Co-pilot | *FastAPI, Next.js, RAG, SQLite* **2026**
Team Project

- Built a CV-grounded career assistant prototype with CV upload, job matching, fit score calculation, cover letter generation, and tracker modules.
- Implemented backend services for CV parsing, skill extraction, recommendation logic, assistant session memory, and dashboard data persistence.

Job Skill Matcher | *Python, NLP basics, SQL* **2025**
Personal Project

- Created a keyword-based matching tool that compares candidate skills against job descriptions and returns matched skills, missing skills, and a percentage score.

EDUCATION

B.Sc. in Computer Science and Engineering | **Expected 2028**
Metropolitan University Sylhet, Bangladesh

- Relevant coursework: Data Structures, Database Systems, Software Engineering, Discrete Mathematics, Web Development, Artificial Intelligence basics.

ACHIEVEMENTS & ACTIVITIES

- Team lead for a hackathon project focused on AI career tools, backend architecture, and product demo planning.
- Regularly practices C programming, graph theory, API development, Git workflow, and full-stack project structure.
