

Araf Rahman

Computer Science Student | Backend & Full-Stack Developer

Dhaka, Bangladesh | araf.rahman@example.com | +880 1712-345678 | github.com/araf-dev | linkedin.com/in/arafrahman

PROFILE SUMMARY

Computer science student with hands-on experience building full-stack web applications, REST APIs, CV parsing pipelines, job matching logic, and AI-powered career tools. Strong foundation in Python, FastAPI, React, TypeScript, SQL, Git/GitHub, and Tailwind CSS. Interested in backend engineering, frontend development, and AI-assisted productivity platforms.

TECHNICAL SKILLS

Languages	Python, TypeScript, JavaScript, C, SQL
Backend	FastAPI, REST API, SQLAlchemy, SQLite, API routing, validation, error handling
Frontend	React, Next.js, Tailwind CSS, HTML, CSS, responsive UI, component-based design
AI / Data	RAG concepts, embeddings, vector search, CV parsing, skill extraction, fit score calculation
Tools	Git, GitHub, VS Code, WSL Ubuntu, pytest, npm, Vercel basics

PROJECT EXPERIENCE

CareerPilot - AI Career Co-pilot | Full-Stack Project

Built a hackathon-style career platform that uploads CVs, extracts skills, searches jobs, calculates fit scores, drafts cover letters, and tracks applications.

- Implemented FastAPI backend routes for CV upload, profile metadata, assistant query, cover letter generation, and tracker workflows.
- Designed CV processing flow for PDF/DOCX text extraction, section chunking, skill extraction, and RAG-ready profile storage.
- Created job fit scoring logic using user skills and job required skills to calculate match percentage, matched skills, and missing skills.
- Worked with React/Next.js frontend pages for upload, jobs, AI assistant, cover letter generation, dashboard, and Kanban tracker.
- Added SQLite/SQLAlchemy models for CV profiles, applications, todos, calendar events, and assistant session persistence.

Task Manager API | Backend Project

- Developed REST API endpoints for creating, updating, deleting, and listing tasks with FastAPI and SQLite.
- Practiced request validation, structured responses, modular routing, and pytest-based API testing.

EDUCATION

B.Sc. in Computer Science and Engineering - Example University, Dhaka

Relevant coursework: Data Structures, Algorithms, Database Systems, Software Engineering, Discrete Mathematics, Web Development

EXPERIENCE

Student Developer / Team Lead - StackFellas

- Led a 3-member team to build CareerPilot for CodeSprint 2026 with clear backend/frontend issue tracking and GitHub workflow.
- Reviewed pull requests, planned demo flow, and coordinated integration between CV upload, job search, fit score, assistant, and tracker features.

ACHIEVEMENTS & INTERESTS

- Built multiple academic and hackathon projects using Python, C, React, and FastAPI.
- Interested in backend development, AI tools, graph theory, system design basics, and practical software engineering.
